

Honolulu Training Syllabus

For (S1)

Table of Contents:

- Section 0 – Forward
- Section 1 – Introduction to VRC
- Section 2 – Facility Based SOP's
- Section 3 – General Procedures
- Section 4 – The NAS
- Section 5 – DEL
- Section 6 – GND
- Section 7 – TWR
- Section 8 – Advanced Tower Maui ATCT
- Section 9 – Advanced Tower Honolulu ATCT

Section 0 – Forward

This is the Student one training outline. It has been created in compliance with VATUSA policy number 07/05 and in coordination with the VATSIM GRP. It has been created to include the introduction to controlling, basic facility procedures, delivery control, ground control and local control. At the end it includes the training outline for our advanced airports. These training procedures are based directly off the VATUSA training references and the FAA Order 7110.65. These training outlines must be completed and will be thoroughly at the end in order for the student to receive his or her certification.

Signed,

Donovan Ernst – Air Traffic Manager

Abel Tuinei – Training Administer

Section 1 – Introduction to VRC

- 1.1 – VRC/ASRC Setup
- 1.2 – Discuss how to use VRC, features needed

Section 2 – Facility Based SOP's

- 2.1 – Controller Activity SOP
- 2.2 – Login SOP
- 2.3 – Closing SOP
- 2.4 – Discuss the training outline for the controller

Section 3 – General Procedures

- 3.1 - Discuss the airports in HCF
- 3.2 – How to create an ATIS

Section 4 – National Airspace System Understanding

- 4.1 – Discuss the different types of airspace
 - 4.1.1 – Controlled Airspace vs Uncontrolled
 - 4.1.2 – Procedures at uncontrolled and controlled
- 4.2 – Reading charts
 - 4.2.1 – Reading Approach Charts
 - 4.2.2 – Reading Sectional Charts
 - 4.2.3 – SID Charts
 - 4.2.4 – STAR Charts

Section 5 – Clearance and Delivery

- 5.1 – Discuss what this position is
- 5.2 – Aircraft types
 - 5.2.1 – Aircraft suffix's
- 5.3 – What VFR and what IFR is
- 5.4 – Direction of flight for IFR aircraft
- 5.5 – Direction of Flight for VFR aircraft
- 5.6 – VFR Clearances
- 5.7 – IFR Clearances
 - 5.7.1 – The CRAFT Acronym
 - 5.7.2 – Transitions
 - 5.7.3 – Radar Vektored Departures
 - 5.7.4 – Preferred Routings
 - 5.7.4.1 – Interisland Preferred Routings
 - 5.7.4.2 – International routings
 - 5.7.4.3 – Introduction to Flight Aware
 - 5.7.4.4 – Introduction to Simroutes
 - 5.7.5 – Lowest Usable Altimeter
 - 5.7.8 – Proper Phraseology
 - 5.7.9 – Introductions to APPREQs
 - 5.7.9.1 – What is coordination
 - 5.7.9.2 – When to use coordination
 - 5.7.9.3 – How to coordinate
- 5.8 – Oceanic Clearances
 - 5.8.1 – What is an oceanic clearance
 - 5.8.2 – What is an oceanic clearance composed of
 - 5.8.3 – Introduction to ZAK Time Table
 - 5.8.4 – Coordination with center to obtain a clearance
 - 5.8.5 – Coordination with ZAK

- 5.8.6 – Delaying a departure
- 5.9 – Sweatbox Clearances
 - 5.9.1 – Oceanic Clearances
 - 5.9.2 – IFR Clearances
- 5.10 – Flight Following
- 5.11 – Take Clearance Delivery Test

Section 6 – Ground Controlling

- 6.1 – What the job of this position is
- 6.2 – Reading an airport diagram
- 6.3 – Proper phraseology
- 6.4 – Ground movement procedures
 - 6.4.1 – Discuss “hold short” information
- 6.5.2 – Following aircraft
- 6.6 – Helicopter air-taxi information
- 6.7 – Coordination with Local Control
 - 6.7.1 – APPREQ
 - 6.7.2 – Runway Crossing
- 6.8 – Sweatbox
- 6.9 – Take the Ground Test

Section 7 – Local/Tower Controlling (Section 3 7110.65)

- 7.1 – The position description
- 7.2 – ATIS Policy
- 7.3 – Selecting Runways
 - 7.3.1 – Selecting based on preset runway configurations
 - 7.3.2 – Coordination with the APP/DEP regarding runway selection
- 7.4 – Traffic Patterns
 - 7.4.1 – What is a traffic pattern
 - 7.4.2 – Discuss the components of a traffic pattern
 - 7.4.3 - Separation of aircraft in the TP
- 7.5 – Departure Procedures
 - 7.5.1 – Departure Releases
 - 7.5.1.1 – Coordination with DEP
 - 7.5.1.2 – Wake Turbulences separation
 - 7.5.2 – Takeoff Clearances
 - 7.5.3 – Helicopter Clearances
- 7.6 – Arrival Procedures
 - 7.6.1 – Landing Separation
 - 7.6.2 – Landing Clearances
 - 7.6.2.1 – Following aircraft landing clearances
 - 7.6.2.1.1 – Aircraft in position
 - 7.6.2.3 – Helicopter Landing Clearances
 - 7.6.3 – Go Abounds

- 7.6.4 – Missed Approach Procedures
- 7.7 – VFR Transitions
 - 7.7.1 – Coordination on transitions
- 7.8 – Traffic Printouts
- 7.9 – What is LAHSO
- 7.10 – Work with the student in sweatbox
- 7.11 – Take Local Test for HCF
- 7.12 – Prepare for S1 Test
- 7.13 – Give S1 Test

Section 8 – Maui ATCT (Advanced Tower)

- 8.1 – Discuss the Maui ATCT/ Surrounding Airspace
- 8.2 – Discuss the airport layout
- 8.3 – Discuss the runway configurations
- 8.4 – Discuss VFR Departures
 - 8.4.1 – North Departures
 - 8.4.2 – South Departures
- 8.5 – Standard Instrument Departures
- 8.6 – VFR Transitions
 - 8.6.1 – Coordination with HCF approach on transitions
- 8.7 – Sweatbox
- 8.8 Give Maui ATCT Test

Section 9 – Honolulu ATCT (Advanced Tower)

- 9.1 – Discuss the Honolulu ATCT/Surrounding airspace
- 9.2 – Discuss the airport layout
 - 9.2.1 – Interisland Taxiways
 - 9.2.2 – Water runways
 - 9.2.2.1 – Reference the 7110.65 sections 3-12-1 through 3-12-3
- 9.3 – Discuss the runway configurations
- 9.4 – Discuss the scratch pads
- 9.5 – Bravo VFR Procedures
 - 9.5.1 – Coordination with HCF Approach
 - 9.5.2 – Squawk Code Assignments
 - 9.5.3 – Flight Following
- 9.6 – SID's
- 9.7 – VFR Transitions
- 9.8 – Sweatbox
- 9.9 – Honolulu Local Test
